

Hanna Kim

EDUCATION

Yonsei University	Seoul, South Korea
B.A., Applied Statistics & Science, Technology and Policy (Double major) – GPA: 4.05/4.50	Mar 2017 – Feb 2023
Academic Honor Roll (GPA Top 10%) : Fall 2017, Fall 2018, Fall 2020 Relevant coursework : Mathematical Statistics I & II, Regression Analysis, Time Series Analysis, Categorical Data Analysis, Statistical Computing, Data Science & Sampling Theory, R & Python Programming,	

WORK EXPERIENCE

HAI (Human AI Interaction) Corp. (Digital Healthcare)	Seoul, South Korea
	Jul 2023 – Nov 2025

Applied AI Data Scientist (Full-time; Oct 2023 – Nov 2025)

- Built a PyTorch CNN pipeline that predicts users' glucose levels from smartphone facial video (PPG recordings); final model reached 8.40% MARD and 99% Clarke Zone A+B accuracy, surpassing standard regulatory approval thresholds and enabling market entry.
- Evaluated SHAP and Class Activation Maps for model explainability, identifying the most important features to be prioritized in data collection; applied PCA and clustering to engineer features distinguishing diabetic and normal profiles.
- Diagnosed low-quality vendor data as a root cause of low performance in initial models; pushed for raw, unprocessed signal data instead, improving performance classifying diabetic vs. non-diabetic profiles from AUC 0.52 → 0.85.
- Drove a strategic vendor transition that cut data costs by >50% and improved data quality — directly linking a technical audit to a measurable business outcome.
- Filtered a raw dataset of tens of thousands of PPG recordings into a high-quality analysis set by researching and validating data-quality metrics against ground truth.
- Presented weekly model progress to C-suite executives, advising professors, and cross-functional teams; curated key performance metrics and visual assets directly incorporated into board decks and investor fundraising materials.

Biostatistician (Full-time; Jul 2023 – Jun 2024)

- Owned statistical analysis and regulatory documentation across the full product lifecycle, from clinical trial design through market approval, as the sole biostatistician on a 7-person team; led analysis for company's first three Ministry of Food and Drug Safety (MFDS) submissions, all approved, including the company's first Medical Device Approval.
- Conducted additional statistical analysis under expert guidance for the resulting JMIR publication as third author.

Global Green Growth Institute (Climate International Organization)

Seoul, South Korea

Research Assistant, Office of the Director-General (Intern)

Feb 2021 – Aug 2021

- Engineered a macroeconomic model forecasting job creation by extracting and transforming complex climate and financial datasets using Excel; resolved critical legacy errors, earning an unprecedented second-author publication credit.

Nexus (personal project — relationship-enhancing application)

Founder

– Ongoing

- Built an end-to-end application, designing the backend and PostgreSQL database to support structured relationship data capture and retrieval.
- Containerized application services using Docker and deployed them on AWS through automated CI/CD pipelines.

LEADERSHIP & EXTRACURRICULARS

TCK Camp Organizing Committee (Camp organization)	Seoul, South Korea
Organizing Committee Member (Volunteer; Organized a 5-days camp for 90+ attendees)	Jun 2025 – Jul 2026

- Spearheaded a data-driven needs assessment that directly shaped overall program design; standardized committee operational workflows to reduce weekly meeting times by 40%, sustained across a full year of weekly sessions.

Yonsei University, Residential College

Incheon, South Korea

Chief Residential Assistant (1 semester); Residential Assistant (3 semesters)

Feb 2018 – Dec 2019

- Managed a 10M KRW annual budget, allocating funds across 20+ academic and social events per semester for a 300+ resident international dormitory; recorded the highest engagement rate in dormitory history.
- Led a team of 12 RAs (6 international, 6 Korean) with the supervising faculty to oversee all dormitory-related affairs, and personally supported 25–30 international freshmen each semester.

Social Innovation Creators' Academia (SICA) (Startup Student Club)

Seoul, South Korea

Vice President (Jan 2021 – Jul 2021)

Aug 2020 – Jul 2021

- Coached 30+ club members on business model design, market-size estimation, and marketing strategy, building original teaching materials; organized alumni mentorship sessions with speakers working in various fields.

SKILLS

- Technical** : Python (PyTorch, scikit-learn, NumPy, SciPy, OpenCV, Pandas); PCA, clustering, Git, Docker, AWS (ECS, RDS); R (dplyr, tidyr, afex, nparLD, effectsize, emmeans)
- Analysis & Visualization** : Excel (VBA), Tableau, PowerPoint
- Languages** : Korean (native), English (native-level)
